

Group heart rate tracking

Wodify Pulse is a group heart rate training experience for gyms. It displays members' heart rates in real time, leveraging Myzone technology and the Wodify Core Kiosk.

- **Intense motivation**

By displaying their progress live on the Pulseboard, members are encouraged to reach their full potential and engage in a little friendly competition.

- **Intuitive setup**

Wodify Pulse easily integrates with the Wodify Core Kiosk, so users can get started right away.

- **Accurate results**

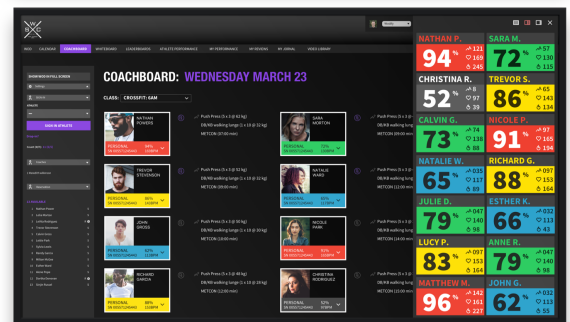

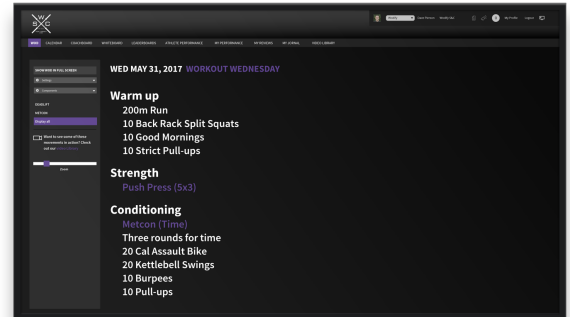

We've partnered with Myzone, a leader in wearable fitness technology, to give members the most accurate heart rate monitoring hardware on the market.

- **A level playing field**

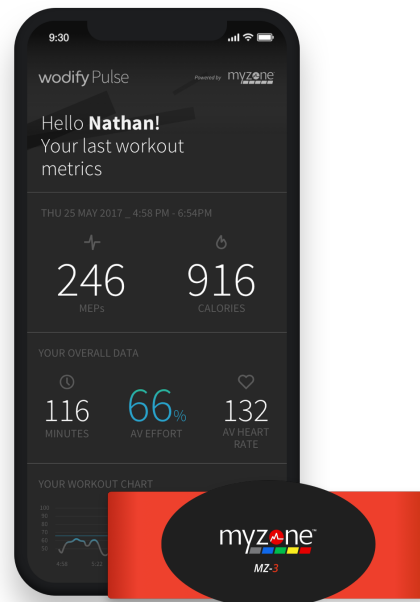

Because results are measured by heart rate, everyone can compete, no matter their fitness level. Rewards are based on effort, not ability.

The hub of fitness innovation

Five years ago, Wodify introduced the CrossFit world to performance tracking technology and things haven't been the same since. Wodify Pulse is the next evolution. By partnering with Myzone, Wodify enables gym owners to capitalize on the wearable fitness trend and stand out from the competition.
